About

Full Name: Eryilmaz, Kerem

I am a PhD candidate at the Artificial Intelligence Lab of Vrije Universiteit Brussel under Bart de Boer as a part of the ERC-funded ABACUS project. I am currently working on using Hidden Markov and Hidden Semi-Markov models to measure combinatorial structure in and attribute such structure to continuous signals. Such signals include but are not limited to speech and bird calls. I am focused on data from artificial language experiments. My interests in the academy include evolutionary linguistics, NLP, language games, (Bayesian) probabilistic models, Hidden Markov Models and their derivatives, corpus linguistics, and general cognitive science. I am a fan of programming, science and technology in general.

Education

- **PhD in Sciences (Computer Science)** at Vrije Universiteit Brussel (Belgium). (2012 to present)
- **MSc in Cognitive Science** at Middle East Technical University (Turkey). (2008 to 2011)
- **BSc in Computer Science** at Bilkent University (Turkey). (2004 to 2008)

Work Experience

- **PhD Researcher** at AI Lab, Vrije Universiteit Brussel (Oct. 15, 2012 to present)
Duties: Computational modeling, experiment design and implementation, data analysis.
- **NATO Advanced Training Course Specialist** at Informatics Institute, Middle East Technical University (May 20, 2012 to June 1, 2012)
Duties: Giving lectures and holding hands-on sessions on cyberdefense, web security in particular, for system/network administrators from Afghanistan for NATO Advanced Training Course on Cyberdefense.
- **Graduate Research Assistant** at Department of Information Systems, Informatics Institute, Middle East Technical University (Oct. 15, 2009 to Oct. 15, 2012)
Duties: Giving introductory IS courses, maintenance and administration of network/IT infrastructure.
